CORE EXPERTISE

Next.js

React.js

Node.js

Express.js

MongoDB

JavaScript (ES6+)

REST APIs

Tailwind CSS

Git & GitHub

CYBERSECURITY

Ethical Hacking

Network Scanning

Kali Linux

VMware Workstation

PROFESSIONAL SUMMARY

Passionate and highly dedicated Full Stack Web Developer specializing in the MERN stack and modern frameworks like Next.js. Proven experience in designing, building, and deploying fully interactive, responsive web applications integrated with secure database schemas and robust API environments. Combines deep development fundamentals with an active focus in information technology and security to construct clean, stable, and client-centric digital solutions.

FEATURED PROJECTS

CyberNova AI Platform

Full-Stack Project

Next.js, Node.js & MongoDB Atlas

- Developed a secure, end-to-end web application featuring custom API endpoints and structured server-side logic using Next.js framework architectures.
- Integrated data persistence with a fully secured MongoDB Atlas cloud environment using optimized data modeling definitions.
- Structured modular frontend interfaces styled with custom responsive design layouts using utility-first CSS engines.

Digital Studio & Interactive Platforms

Deployment & UI

Git/GitHub, HTML5, CSS3, Live Servers

- Architected full high-fidelity studio landing pages optimized meticulously for user interaction mechanics and fast load-times.
- Successfully built and structured a presentation application deployed to an active production environment using remote server configurations.
- Utilized automated source-control version matrices through command-line Git protocols to manage structured project builds across web instances.

EDUCATION & TRAINING

Bachelor of Science in Information Technology

Ongoing

University Level Curriculum

- Recipient of an honorary academic award for technical excellence.
- Core studies emphasize advanced database engineering structures, networking topologies, application security patterns, and software lifecycles.

Ethical Hacking & Network Security

Specialization

Cybersecurity Focus Lab

- Engineered localized network simulation infrastructures utilizing custom hypervisors and VMware virtualized environments.
- Hands-on proficiency running Kali Linux penetration configurations, structural network audits, and terminal automation profiling tools.
